## Commodities

# Bay Area has 6 ZIPs in top 10

**ZIP from page D1**  
average sales price came in at \$308,543.

While the hot — and cold — ZIP codes tend to fluctuate in rank from quarter to quarter, 94608 also was in the top 10 in the third quarter of 2009.

Much of the housing stock is single-story, Craftsman style one- and two-bedroom homes built from 1910 through the 1940s. The neighborhoods there also have seen their share of foreclosures

bought up by investors and resold at much higher prices. Nearly half of the area's 27 properties sold since January were bank owned.

Lorri Arazi, a Realtor with Pacific Union International, sold two-bedroom, single-family homes in the ZIP code during the boom times for \$550,000 to \$600,000. She said the top price in recent months for a two-bedroom home in the area was about \$530,000.

Arazi described the area as, "relatively affordable, made up of bungalows, many with original details and on relatively small city lots." She noted that it is representative of the Bay Area's ethnic and age diversity and that approximately 20 percent of the homes have been renovated.

According to ZipRealty, the third-hottest U.S. ZIP in the first quarter was 94621, an East Oakland neighborhood not far from the Oakland Coliseum, between San Leandro Street and International Boulevard.

Other high-ranking Oakland ZIPs were 94606 and 94603, also on the

**"The Bay Area market as a whole right now has a bit of a shortage, and, in high distress areas, investors and first-time home buyers are seeing low prices and low interest rates and can buy where they could not before."**

John Oldham, ZipRealty

city's eastern side. San Jose's 95122 came in fifth in the nation, and San Pablo's 94806 registered sixth.

ZipRealty Marketing Director John Oldham said part of the explanation for East Bay houses selling above asking relates to the shortage of available homes.

For months, East Bay Realtors have described low inventory that has at times created bidding wars in the low to moderate price ranges.

"The Bay Area market as a whole right now has a bit of a shortage, and, in high distress areas, investors and first-time home buyers are seeing

low prices and low interest rates and can buy where they could not before," Oldham said.

Chicago's Loop neighborhood, whose ZIP is 60603, was the hottest ZIP for the first quarter of 2010. Sales prices there were 10.2 percent above asking, with homes selling for an average of \$838,101.

Oldham said the Chicago ZIP code represents another recent trend: Sellers in upper-end areas are starting to put homes up for sale, but there still is not a lot of inventory, so the market is competitive.
